Netbook Training Cases

Highly mobile usage
Intelligently designed interior saves time!

Netbooks are ideal for certain applications. They are less expensive and smaller than conventional laptops. But how do you manage them if a laptop cart is too big and you want to use them everywhere?

If you need to use and organise a number of netbooks, Parat has the ideal solution for making them simpler and safer to use. Highly mobile training cases open up completely new possibilities as a supplement to conventional laptop carts.

- Parapro netbook training case – the original. A robust, compact transport case with an intelligently designed interior.
- The features and technology of the case help save a great deal of time.
- Up to 16 identical or similarly designed netbooks can be automatically connected to the power supply.
- The slots of the netbooks are configured to suit each type of device.
- It is no longer necessary to plug in each separate cable manually, leaving more time for training or teaching. Simple and safe.
- The netbooks can all be charged simultaneously via one single cable via an integrated charging management system. The original power adaptors for each separate netbook are no longer needed.
- Using the integrated access point all devices in the vicinity of the case can be connected to the WLAN network. A built-in RJ 45 plug connects the case with the building's network.
- The charging management system and the access point can be operated independently.
- The integrated trolley makes the case easy to transport. It can also be moved up and down stairs within a building and even from one training course to the next by car.
- A fixture for standard padlocks means the case is also easy to lock.

The table shows a selection of compatible netbook models and is regularly updated. If the model you require is not listed, please ask us.

Item number	Netbook model
6582.311.391	16x Samsung NC-10, incl. AP
6582.312.391	16x HP Mini 2133, incl. AP
6582.313.391	16x Lenovo S10e, incl. AP
6582.315.391	16x HP Mini 2140, incl. AP
6582.317.391	16x TOSHIBA NB200, incl. AP
6582.318.391	16x Acer Asp. D250, incl. AP
6582.319.391	16x Acer Asp. Pro531, incl. AP
6582.320.391	16x Dell Lat. 2100, incl. AP

AP = Access Point, AP is included in delivery

Technical specifications:

- Equipped with trolley
- Lockable
- Stackable
- Dustproof
- Extremely shock resistant
- Outer measurements (L x W x H): 580 x 440 x 330 mm
- Weight: approx. 16 kg, incl. charging management and access point

Wi Fi™

Automatic docking system for simple charging

Centralised charging management system for all devices with integrated cooling

Work, surf and install without wires with the wireless access point

Well stored – the robust training case is water- and shock-resistant
